FOR IMMEDIATE RELEASE

Angel 7 Industries, Quality Imports New Zealand Enter into Partnership for Representation in New Zealand and Australia

(San Antonio, Texas, November 1, 2015) – **A7 Defense & Aerospace**, a division of Angel 7 industries, LLC (A7) has entered into a partnership with Quality Imports New Zealand to supply New Zealand and Australia, allied countries with A7's state-of-the-art and next generation military and tactical products and solutions. This mutually beneficial relationship will enhance A7's market position internationally and will provide New Zealand and Australian customers with enhanced support and faster response time with regards to A7's cutting edge products.

Quality Imports New Zealand's management has expressed their enthusiasm of the partnership with A7, stating "Quality Imports Ltd is pleased to be associated with Angel7 Industries, a company who has some cutting edge technology, is innovative, forward thinking and has a strong commitment to serving its customers with the best it can."

Quality Imports Ltd. is a registered and contracted supplier to various New Zealand based government departments. We offer a range of services and a wide range of product from around the globe and specialise in high quality items. Contact info@qualityimports.co.nz for more information.

Angel 7 Industries, LLC. (A7) is a privately held technology think tank and research and development firm that was founded by Kerry Harris, a former United States Marine Corps officer and Naval aviator. A7 designs, engineers, and produces state-of-the-art products, systems, and solutions that enhance safety, enhance performance, enhance survivability, and increase utility.

A7 Defense & Aerospace, a division of Angel 7 Industries, specializes in state-of-the-art products and solutions for military, state, and government agencies – developing and manufacturing products and solutions that are designed to protect and increase the survivability of individual operators with special emphasis on foundational technologies that are multi-capable, adaptable to varying mission requirements, and to constantly evolving threats.
